

SkillMatch AI - Startup Concept

Imagine an app that gives you a real interview, scores your brain, and matches you to jobs instantly
- even CEO-level connections if you're great.

Introducing: SkillMatch AI.

This is not just a resume replacement tool. It's an AI system designed to simulate real interview questions, analyze logical thinking, decision-making ability, and emotional intelligence - all in a live chat or typing interview format.

Key Features:

- AI-powered typing-based interviews
- Brain scoring system based on logical thinking
- Instant job role recommendations
- Connects high-scoring candidates to CEOs or top-level hiring managers directly
- GPT-level natural conversation for skill analysis

Why It Matters:

- Current job platforms rely on keyword matching and degrees
- This tool understands human potential through conversation and logic
- Great minds from small towns can be discovered without bias

Monetization Model:

- Freemium: basic skill testing free, deeper analysis premium

commercial use.

SkillMatch AI - Startup Concept

- Job providers pay for access to high-quality candidates
- Optional API licensing for corporate HR departments

What We Need:

- Early funding for MVP (developer + designer cost)
- AI community and mentor support (OpenAI, DeepSeek, etc.)
- Visibility and strategic partners
